README

Code Beautifier Visual Studio Code Extension

Beautify css, sass and less code (extension for Visual Studio Code)

Command "beautify.format"

If you beautify other languages the code/text will be beautified to Visual Studio Code's default formatter.

Options:

- beautify.tabSize (Tab size to indent the code)
- beautify.options (Beautifier options: <https://github.com/beautify-web/js-beautify>)
