Setup and run DEVHINTS.IO cheatsheets on localhost

☑ Jun 08, 2018 | 🖔 Hits

0 CommentsGuestbook

This is a static website based on Jekyll framework https://jekyllrb.com/. Need install Jekyll and .

Login as user "root" due to write permission required into /Library/Ruby/Gems directory. Install bundler and Jekyll at first:

igloo:cheatsheets root# gem install bundler jekyll

Then install all this application dependent libraries:

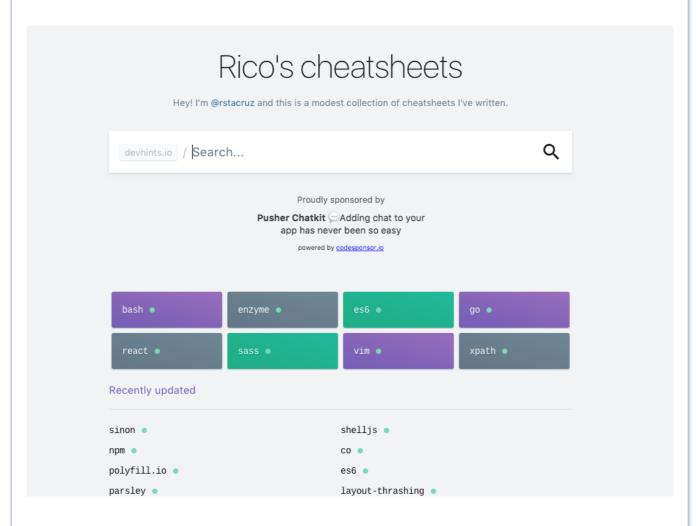

igloo:cheatsheets root# bundler install

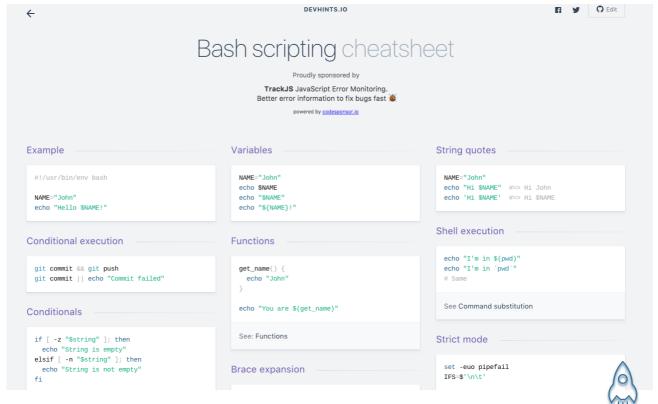

Start up Jekyll website on localhost, with user "terrence" this time:

```
terrence@igloo ~/Projects/cheatsheets (master Z=)
1
      17:28:56 \lambda bundle exec jekyll serve --incremental
3
      Configuration file: /Users/terrence/Projects/cheatsheets/_config.yml
                  Source: /Users/terrence/Projects/cheatsheets
4
             Destination: /Users/terrence/Projects/cheatsheets/_site
5
       Incremental build: enabled
6
7
            Generating...
8
      DEPRECATION WARNING on line 83, column 12 of /Users/terrence/Projects/cheat
      Unescaped multiline strings are deprecated and will be removed in a future
9
      To include a newline in a string, use "\a" or "\a" as in CSS.
10
11
                          done in 3.163 seconds.
12
       Auto-regeneration: enabled for '/Users/terrence/Projects/cheatsheets
13
14
          Server address: http://127.0.0.1:4000
```

Server running... press ctrl-c to stop.

Go to URL: http://127.0.0.1:4000 start searching and using cheatsheets in localhost environment:

To generate static web content ONLY:

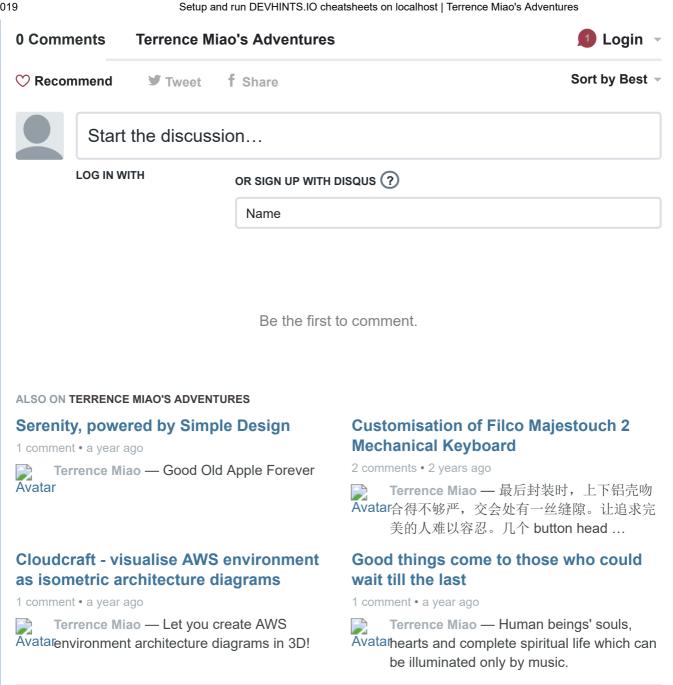

```
terrence@igloo ~/Projects/cheatsheets (master Z=)
2
      17:28:56 \lambda bundle exec jekyll build
      Configuration file: /Users/terrence/Projects/cheatsheets/_config.yml
4
                  Source: /Users/terrence/Projects/cheatsheets
             Destination: ../terrencemiao.github.io/cheatsheets
5
      Incremental build: disabled. Enable with --incremental
6
7
            Generating...
      DEPRECATION WARNING on line 83, column 12 of /Users/terrence/Projects/cheat
8
      Unescaped multiline strings are deprecated and will be removed in a future
9
      To include a newline in a string, use "\a" or "\a" as in CSS.
10
11
12
                          done in 43.269 seconds.
       Auto-regeneration: disabled. Use --watch to enable.
13
```

Then can upload published website content from ../terrencemiao.github.io/cheatsheets directory to https://terrencemiao.github.io.
